A crush at work

Our Bucket Crushers make easy work of concrete debris, rubble, masonry, asphalt, natural stone and rock by crushing the material on site.

The internal **timing belt transmission**, driven by **two** powerful **hydraulic motors**, has a narrower design and enables a reversible running direction to remove jammed material.

Quick grain size adjustment without special tools thanks to an intuitive system.

To increase throughput, a **moving sliding plate** continuously guides material to the crushing jaw.

Crushing jaw plates can be easily replaced on-site.

Our Bucket Crushers combine low maintenance and high performance. On-site crushing also means less transportation and dumpsite costs.

BC 2100
Grain sizes 20/40/60/90 mm

BC 2500/BC 3700/BC 5300
Grain sizes 20/45/70/95/125/150 mm
