# Levelling the working field

The straight design of the Demolition Pulverizer makes it optimally suited for primary demolition and secondary reduction of non-reinforced and reinforced concrete structures.

Faster working cycles thanks to the integrated **speed valve**.

Full hydraulic cylinder protection thanks to the **piston rod guard**.

360° endless **hydraulic rotation** allows optimal positioning and precise handling.

Cutting blades are both replaceable and reversible.

Tooth plates are replaceable.

**Demolition tooth plate** for primary demolition.

**Recycling tooth plate** for secondary reduction.

Long-term use is guaranteed by the extremely robust design of the Demolition Pulverizers. Wear parts are also easily replaced on-site.
