Hydro Magnets are the best way to pick up valuable scrap metal on-site and turn it into profit. They also protect the workforce and equipment by keeping the ground clear and safe.

Magnetization can be operated either hydraulically or electrically by **radio remote control**.

Integrated **LED status display** allows constant monitoring of the operating conditions.

Fixed magnet plate for demolition and construction sites and **movable magnet plate** with chain connector for mass loading at scrap yards.

Built-in **generator with advanced control technology** provides faster material pick-up by a quick magnetization with impulse excitation and material release by automatic demagnetization with counter voltage and sequence pulsation.

Easy installation makes the Hydro Magnets ideal for demolition sites, scrap yards and recycling facilities.
